

September 19, 2025: On Continuing Intrusions and Harassments

I am writing to continue documenting the ongoing and continuous intrusive 'dialogue' that is being forced into our home by loud vehicles that pass by to 'accent' or 'advance' certain connections to the work that I am continuously producing.

These loud vehicles drive onto our (otherwise) quiet street, drive loudly past our home, and then continue to another street without any business on our block. Our street is not a central gathering point for any main road and both the entrances and exits of the street are marked by awkward turns from the main road.

The increased traffic is difficult to accurately describe, because I will need specific tools and the inclination to sit and count in order to gain a specific number. However, the vehicles are often exceeding multiple trucks or cars per minute and could easily be counted as 'hundreds' of vehicles driving messages into our home every day.

As I have already described, the USA military has evidenced to me the clear ability to see us inside of our homes. There is no doubt in my mind that the USA intelligence community is operating with technology that has advanced imaging capabilities to 'see' exactly what we are all doing inside of our own homes at any time they choose to 'peek' in.

In our case, we are under the 24/7 surveillance of an 'all-seeing eye' that is now choosing to beg us for attention in a constant and threatening way.

I am continuing to document that these noises use every opportunity to speak 'symbolism' to me and have shown an advancing 'vocabulary' that is based upon the work that I am producing daily.

This is a type of 'machine learning' that is being used to 'speak' messages directly to us in our home. I am certain that this is the type of 'behavioral modification and control' that is being utilized to split our world apart at this very moment.

Political Representatives: I am strongly urging each of you to exercise your oversight, policy-making, and budgetary roles to curtail the illegal and evil use of USA military technology against the people of the United States of America and also those areas abroad that are not within an officially declared area of nationally recognized 'war.'

These intrusive spying technologies and non-lethal acoustic bombardments are highly harmful to our mental health and I am personally explaining to you that I am witnessing these connections being made to such a degree that I am confidently explaining that these methods are being used to agitate and cause mass casualty events.

Please address the USA military spying apparatus accordingly.

Law enforcement: please investigate your own agencies for signs of cooperation and collusion with these forces. I am recommending that you begin looking for 'signs' contained within your formal disciplinary records as I have already seen those signs contained therein.

Thank you to everyone that is helping to make life better in the world.
